

Groww pulse - Product Lead Team Report

Weekly Insights Report

Top 3 Themes

1. Double SIP AutoPay Mandate Duplication: Recurring payment microservice executing SIP mandates twice in a month without authorization.
2. iOS Candlestick Chart Freezes during Peak F&O: Post-update UI regression causing charts to freeze on iOS during opening market hours.
3. Bank Account & Mandate Validation Stalls: Multi-day delays in bank account verification blocking fund deposits.

Real User Quotes

- > "SIP amount deducted twice this month. Double deduction happened without any reason. User [EMAIL REDACTED] ticket unresolved."
- > "Latest update freezes option charts on iOS. Screen goes blank during fast market moves for account [ID REDACTED]."
- > "Bank verification stuck for 5 days. Cannot set up AutoPay mandate. Contacted support at [EMAIL REDACTED]."

Action Ideas

- Product/Growth: Build an automated mandate deduplication engine in payment backend services to block double debits.
- Support: Deploy hotfix patch optimizing iOS chart rendering pipeline and WebSocket data stream buffers.
- Leadership: Automate real-time bank validation via direct NPCI API webhooks to clear KYC bottlenecks.
